

Agent Less Web SSO with Bluecoat ProxySG

Datasheet

IMAG-TrueSSO provides agent less Web Single Sign On for hosted applications with Bluecoat ProxySG Appliance. Users now can automatically get logged into Salesforce.com, Concur.com, Yahoo, Google and many other applications with one single network Id.

- Agent less Web Single sign on for hosted and web enabled applications
- Identify and disable unused licenses - saving license costs
- SAML support for enterprise authentication with AD, eDir
- Transparent implementation password policies with SSO for compliance
- Zero day access for new employees with centralized console to disable accounts
- TrueSSO with complete self service portal for password resets
- TrueSSO with password synchronization across domain controllers and applications
- Self Service password reset portal
- Zero Day provisioning and De-Provisioning by integrating with agent based SSO's like Imprivata

Software as a service or Software on demand is forecasted to have a compound annual growth rate of 22.1 to 35% through 2011, more than double the growth rate for total enterprise software (Gartner – August 2007 & IDC 2007)

Enterprises today are increasing using services like Salesforce.com, ADP.com, SuccessFactors, Google etc. Multiple user Id's and passwords are usually tracked on post-its on the screen and are not managed or authenticated by enterprise IT infrastructure leading to security and compliance issues.

IMAG-TrueSSO

IMAG's TrueSSO provides Agent Less Web Single Sign-on for on-demand applications like Sales Force, SuccessFactors, ADP, Google applications. Users no longer need to remember multiple user-id's or passwords while accessing these applications. IMAG-TrueSSO also works with any enterprise web enabled applications like Oracle 11i, SAP etc

Integration with Bluecoat's ProxySG Appliance

IMAG-TrueSSO appliance can be field integrated with Bluecoat's ProxySG Appliance in less than 10 mins. Application login pages will be directed to IMAG in both Http and Https mode. IMAG uses specific application credentials with AD authentication to sign user into the application. This process is completely done in background.

Save License expenses for hosted Applications

IMAG-TrueSSO can identify and disable inactive licenses thereby saving thousands of dollars in license costs. IMAG can also synchronize with payroll systems to identify and disable licenses based on employee status.

SAML authentication for security

IMAG-TrueSSO supports SAML authentication. Enterprise Active Directory or eDir can be used as a backend authentication for hosted applications like Google Apps, Sales force.com etc

Workflow enabled provisioning with Zero Day SSO

IMAG brings back to the enterprise control over On-demand applications addressing the security and compliance needs. Enterprise IT departments now can centrally create and disable user identities approvals.

Compliance reports for SOX

IMAG-TrueSSO generates canned reports on users and there activity on quarterly basis.

Specifications

- 2x10/100/1000 Ethernet Ports (Ingress, Egress)
- 1 x 10/100/1000 Management Port

Dimensions

- 1.7" in (Height), 16.8" (Width), 14.0"(Depth)
- Weight 14.5 lbs (6.6 kg)
- 1 U Rack mountable Software

Standard Warranty Coverage

- 1 year Hardware & Software
